Guidelines for the Use of Generative AI and AI-Assisted Technologies in Scientific Writing

These guidelines pertain solely to the writing process and do not endorse the use of AI tools for conceptualizing, designing research, or analysing data during the research phase. Formal AI assessments may occur at any stage and will be conducted on a case-by-case basis as part of the R&D plagiarism check and technical review.

Usage of AI in Writing

Authors may utilize generative AI and AI-assisted technologies to enhance readability and language in their writing. However, it is essential for authors to thoroughly review and edit the AI-generated content, as it may be inaccurate, incomplete, or biased. Ultimately, authors are responsible and accountable for the content of their work.

Authorship and Citation

Generative AI and AI-assisted technologies should not be credited as authors or co-authors, nor should they be cited as such in any manuscript.

Disclosure Requirements

Authors must disclose the use of generative AI and AI-assisted technologies in their manuscript (proposal, synopsis, thesis, journal submission, etc.) by including a statement at the end of the manuscript, prior to the References list. This statement should be placed under a new section titled "Declaration on the Use of Generative AI and Assisted Technologies in the Writing Process."

Suggested Declaration Format

The authors declare the use of generative artificial intelligence, specifically (name and version of the AI technology/tool), in the writing of this manuscript and/or in the creation of images, graphics, tables, or their corresponding captions (please specify all instances of usage). After utilizing this tool/service, the authors reviewed and edited the content as necessary and accept full responsibility for the publication's content.

Non-Use Declaration

If no generative AI or similar technology has been employed, the following statement should be included: The authors declare that they have not used any form of generative artificial intelligence in the writing of this manuscript, nor for the creation of images, graphics, tables, or their corresponding captions.
